Introduction to Basic Data Structures

Module 2.5: Practice Day 01

(Codeforces Links)

Codeforces Problem Links:

1. F. Reversing (Solve by reversing the vector)
2. C. Replacement (Solve using vector)
3. D. Counting Elements (Solve using vector and built in functions)
4. J. Count Letters (Use vector as frequency array)
5. Y. Range sum query (You'll get TLE, no problem, **don't ask for support, we will solve it on next module**)
6. After solving each problem, calculate your solution's time complexity.
